

Partner organisations

> Research institutes

INRA – National Institute for Agricultural Research – France (coordinator)
Wageningen University & Research Centre – The Netherlands
Julius Kühn Institute – Germany
Rothamsted Research – United Kingdom
CNR – National Research Council – Italy
Agroscope Changins-Wädenswil Research Station ACW – Switzerland
IHAR – Plant Breeding and Acclimatization Institute – Poland
CIRAD – Centre for International Cooperation in Agricultural Research for Development – France

> Research and extension services

VFL – Knowledge Centre for Agriculture – Denmark
ACTA – Network for Innovative Research in Agriculture – France

> Universities

Aarhus University – Denmark
Scuola Superiore Sant'Anna – Italy
Szent Istvan University – Hungary
University of Lleida – Spain

What is ENDURE?

ENDURE is a consortium of research institutes, universities and extension organisations providing information and a platform for knowledge exchange regarding all aspects of Integrated Pest Management (IPM). The group builds on the experience and knowledge amassed within the European Commission-funded ENDURE Network of Excellence (2007-2010).

ENDURE supports scientists, policy and farm advisers, and trainers by providing research tools, a freely available online information centre and a Network of Experts.

ENDURE is driven by scientists and farm advisers from institutions across a wide range of European countries. It offers support and validated information to farm advisers via the Network of Advisers and the ENDURE Information Centre, to scientists via the ENDURE Resource Centre, and to policy advisers via the ENDURE Network of Experts, all of which can be accessed on the ENDURE website at www.endure-network.eu.

Smart, science-based decisions

European and national crop protection policies should be based on sound science. ENDURE is supporting the European Commission and Member and Associated States in developing and implementing National Action Plans to meet the new EU requirements. Policy stakeholders can use the ENDURE Network of Experts to provide on-demand scientific expertise and assessments for advancing IPM.

Support to farm advisers

Farm advisers and farmers can benefit from each other's practical knowledge and experience. The ENDURE Information Centre provides practical and scientifically sound information and training materials for extension services across Europe. ENDURE's Network of Advisers facilitates knowledge-sharing and discussion on IPM within the agricultural advisory community. The IPM Training Guide is a practical tool with relevant information for training activities.

Sharing science

Synergy, dynamics and shared knowledge are the basis of science. The ENDURE Resource Centre pools the group's research resources and makes them available to the scientific community at large. ENDURE generates networked experimental set-ups, encourages and supports mobility among researchers, and contributes to higher education in IPM.

Meeting future needs

ENDURE identifies research and development priorities in Europe and other areas through an ongoing and productive dialogue with scientists, advisers and other stakeholders.
